EDUCATION

University of Michigan – Dearborn Dearborn, MI

BSE Computer Engineering & BSE Electrical Engineering (Dual Degree) Expected May 2029

Cumulative GPA: 3.38/4.0 | Relevant Coursework: Digital Systems, Calculus I & II, General Physics, Intro to Engineering & Design

WORK EXPERIENCE

Tiger Price | Remote

Lead Full-Stack Developer – E-Commerce Platform, Jul 2025 – Present

- Architected and built a full e-commerce platform from the ground up using React, Vite, and CSS
- Integrated Firebase for back-end services, including real-time database, authentication, and inventory management
- Implemented Stripe payment processing, enabling secure end-to-end online transactions
- Sole developer responsible for all platform features: storefront, product catalog, cart, checkout, and admin dashboard

PCPros Onsite | Michigan

Computer Repair Technician Intern, Jun 2023 – Jul 2023

- Diagnosed and repaired hardware and software issues on laptops and desktop PCs for residential customers
- Performed OS installations (Windows), system maintenance, data recovery, and hardware upgrades
- Provided customer-facing technical support, translating complex issues into clear solutions

KinPOS | Colombia

Technology Intern – Point of Sale Systems Apr 2024

- Gained hands-on experience with point-of-sale systems and retail technology infrastructure
- Assisted in the setup, configuration, and support of POS hardware and software solutions

PROJECTS & ENTREPRENEURSHIP

Tootor – On-Demand Tutoring App | Co-Founder & Lead Developer

Mobile App Startup | iOS & Android (Flutter) Jan 2025 – Jun 2025

- Co-founded a startup to build an Uber-style marketplace connecting students with online tutors
- Designed and developed the full cross-platform mobile app using Flutter, targeting both iOS and Android
- Architected in-app purchase functionality and tutor booking/payment flow
- Led all product design and development decisions; the project reached near-launch stage before halting due to funding constraints

Line-Following Robot | University of Michigan – Dearborn

ENGR 100 – Intro to Engineering & Design | Team Project Fall 2025

- Designed the full 3D model of the robot chassis using CAD software, optimizing for structure and weight
- Programmed the Arduino microcontroller to implement line-detection and autonomous navigation logic
- Assembled and integrated hardware components with custom firmware in a collaborative team setting

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, React, Vite, CSS, HTML, Dart (Flutter), C++ (Arduino)

Tools & Platforms: Firebase, Stripe, Git/GitHub, Arduino IDE, CAD (3D Modeling)

Hardware & Systems: PC assembly & repair, Windows OS, embedded systems (Arduino)

Spoken Languages: Spanish (Native), English (Fluent – ESL Certified), French (A2/B1)

ADDITIONAL

Certifications: ESL – English as a Second Language

International Experience: Studied & worked across Mexico, USA, Colombia, and France
